

MULTI-ROLLERS™

RIG THE PERFECT ANGLE EVERY TIME. TWO PICKING ARMS — EACH WITH FIVE ADJUSTMENT HOLES — MAKE IT EASY.

iTOOLco.

The Multi Roller features extra wide, profiled phenolic rollers. Rollers ride on rated bearings. Extra deep side walls (made from 1/4" 6061 aluminum) offer a light yet durable tool. The adjustable picking arms allow users to fine tune the adjustment angle without extra rigging.

THE FLEXIBLE DESIGN OF THE MULTI ROLLER PICKING ARMS MADE THEM MUCH EASIER TO RIG THE CORRECT ANGLE. We didn't need to keep messing with the length of the sling to get the angle we needed. They're much lighter too!
