

L.I.P.™ CONDUIT SHEAVES

LOCK-IN-PLACE FEEDING SHEAVES

iTOOLco.

Locks in place - overhead at any angle -
in under a minute

Fully adjustable thread depth

L.I.P.™ (Lock-in-Place) Conduit Feeding Sheaves lock in place at any angle or inclination. The phenolic resin wheel is more durable than cast and won't dent or break. Unlike conventional sheaves, L.I.P.™ Conduit Sheaves enable the installer to stay clear of the equipment, keeping hands and limbs safety out of the way. Needle bearing rollers ensure a smooth installation by minimizing drag on the pull and reducing the risk of damaging valuable wire.

Reduces risk of damaging valuable wire
