

# UTILITY PULLER 6K™

MINIMAL SET-UP WITH THE TRUCK  
MOUNTED BI-DIRECTIONAL BOOM

**iTOOLco.**

Tackle unique set-up challenges with precision and performance using iTOOLco's Utility Puller 6K™. Designed for faster set-up, the Utility Puller 6K's articulating receiver adapter can be positioned 180 degrees vertically or horizontally at the precise angle needed to get the job done.

With the hardworking Utility Puller 6K, you can transfer heavy pulling loads to the ground within inches of the conduit you're pulling through. For overhead pulls, line guide rollers keep the rope centered on the capstan.
