

CANNON MVP20K™

PULL UP TO 65' PER MINUTE

iTOOLco.

Attaches to Any High Flow Skid Steer

Hydraulic Adjustment of Extensions

Designed to handle your toughest pulls, iTOOLco's Hydraulic MVP20K is sure to meet any challenge. The fully self-contained unit attaches to any high flow skid steer, providing long awaited jobsite mobility.

iTOOLco's industry leading dual capstan design and overall jobsite versatility afford operators many different setup configurations. Hydraulic booms ensure an easy set up and placement, increasing pulling efficiency. The MVP20K features an adjustable output torque limit dial, allowing the user to set load limits prior to the pull. Ensuring the puller never exceeds the preset limit by shutting the capstans off. With staggering pulling speeds reaching up to 65' per minute under load, the MVP20K is the most advanced pulling system on the market today. An easy to read force gauge and optional running line tensioner make quick work of monitoring and recording pulling tensions.
