

# 12 TON CORDLESS DIELESS CRIMPER

SECURE & PRECISE CRIMPING EVERYTIME

**iTOOLco.**

Dieless Crimper

Swivel Head Design

12 Tons of Pressure for Secure Crimping

iTOOLco's 12 Ton Cordless Dieless Crimper makes crimping a breeze. With a crimp range of 8 AWG to 1000 MCM, the streamline design allows for one handed operation. Meanwhile the dieless crimping head minimizes parts lost in day to day operations. Simply line up your crimp in the crimper, engage the trigger, and wait until you hear the audible bypass sound. The predetermined pressure ensures your crimp is given the correct amount of pressure for a strong hold. When done, press the release button and go.
