

CANNON 10K™

TWO WIRE PULLERS IN ONE

iTOOLco.

iTOOLco's Cannon 10K™ is the fastest and strongest wire puller on the market. This versatile puller is easy to maneuver and can be changed quickly from side pulls to overhead or underground. The Cannon 10K™ is the only 10,000 lb. wire puller that can be attached to the receiver hitch on a truck.

**WE HAD FIVE PARALLEL RUNS OF 500 MCM,
540 FEET LONG TO PULL, AND WE GOT THEM
ALL PULLED IN ABOUT FOUR HOURS.**

Made a profit of about \$4800 the first day. We now own eight Cannon 10K™ pullers and three Cannon 6K™ tuggers, as well as 12 sets of the Real Jacks™ for feeding wire.

**Kenny C.
Inglett Stubbs Electrical Construction**

Versatile enough to fit in small spaces.

Compatible with receiver hitches.

User stands to the side during pulls.

FASTER SAFER WORKSPACE
